

CYRUS COIN

WHITEPAPER

In this whitepaper we present Cyrus Coin Project ,a brand new payment tool based on the Binance Smart Chain (BEP 20)

Cyrus Coin is a universal currency and payment tool , but it also provides opportunities for people to take advantage of their own innovations and new projects. Cyrus Coin is supported by a great technical team with a wide range of commercial skills. It is a unique decentralized system for joint decision making between the lead team, project representatives and all investors as well as owners of the currency.

Considerations

The objective of this vision paper is for informational purposes only and to present Cyrus Coin to potential token holders relating to the proposed ICO. The information below may not be exhaustive and does not imply any elements of a contractual relationship. Its sole purpose is to provide relevant and reasonable information in order to determine a thorough analysis of the company, the proposed ICO and in particular the terms and explanatory notes of such ICO.

Cyrus Coin is speculative and involves a high degree of risk and uncertainty, please see the risk section in the terms and explanatory notes of Cyrus Coin for more information. This document is a marketing document and is not intended to be legally binding. Nothing in this document shall be deemed to constitute a prospectus of any sort or a solicitation for investment, nor does it in any way pertain to an offering or a solicitation of an offer to buy (or sell) any investments in any jurisdiction and should not be construed as such. The information in this document does not constitute a recommendation by any person to purchase Cyrus . Certain statements contained in this document may constitute forward-looking statements or speak for future events or plans. Such forward-looking statements or information involve known and unknown risks and uncertainties, which may cause actual events to differ materially. No reliance should be placed on any such forward-looking statements or information

Introduction

Blockchains have been revolutionary by allowing anyone to own and transfer assets across an open financial network without the need for a trusted third party. Now that there are hundreds [1] of blockchain based assets, and more being added every month, the need to exchange these assets is compounding.

Introduction

With the advent of smart contracts, it is possible for two or more parties to exchange blockchain assets without the need for a trusted third party.

Decentralized exchange is an important progression from the ecosystem of centralized exchanges for a few key reasons: decentralized exchanges can provide stronger security guarantees to end users since there is no longer a central party which can be hacked, run away with customer funds or be subjected to government regulations. Decentralized exchange will eliminate these risks by allowing users to transact trustlessly - without a middleman - and by placing the burden of security onto individual users rather than onto a single custodian. Rapid iteration and a lack of best practices have left the blockchain scattered with proprietary and application-specific implementations.

As a result, end users are exposed to numerous smart contracts of varying quality and security, with unique configuration processes and learning curves, all of which implement the same functionality.

As a solution , Cyrus ecosystem , launched its first token in 30th July 2021 under the supervision of the Cyrus international holding based in London , UK. in order to find safe , high security and new ways to invest funds, providing all interested parties with the opportunity to manage their savings and generate income in the promising segment of cryptocurrency assets, while ensuring reasonable risks . For all these reasons , our motto in Cyrus ecosystem is with Cyrus , you can : Build your own empire

Cyrus coin is a completely decentralized, secure digital currency whose creation is controlled by cryptography. The name of this coin comes from Cyrus The Great , the Persian Empire who had the vision and the strength of character to implement reforms that brought peace to his subjects and respected the principles of human rights and cultural tolerance .

He also implemented the creation of standardized gold and silver coins, thus transitioning the empire from a barter economy into a money economy which can be considered as a revolution in commerce .

After a long time money commerce has started changing and The blockchain technology removes the need for a middleman as the validity of a transaction is confirmed by the network of independent nodes.

blockchain technology makes old payment systems redundant and outdated.

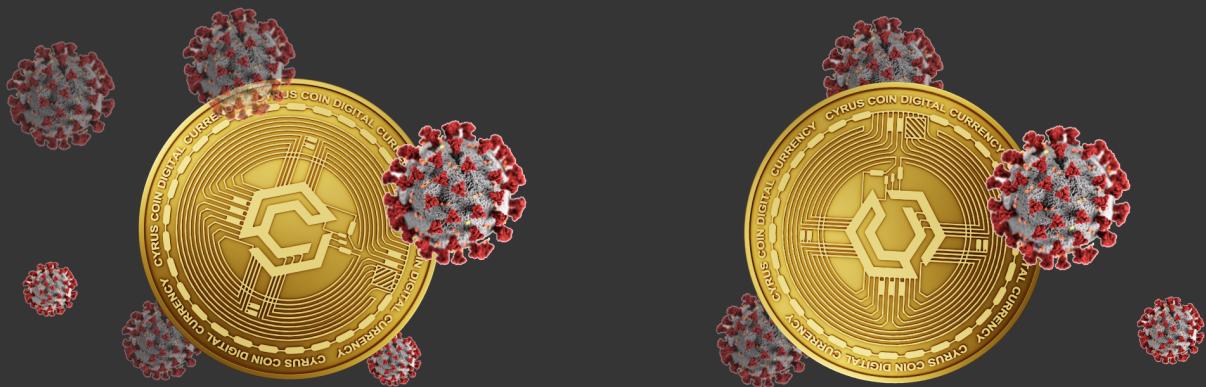

The Cyrus Project started just at the beginning of Covid-19 pandemic

. At the beginning No one could predict how it might affect the economics all over the world .

As well as being a human tragedy, the COVID-19 pandemic has been an unprecedented economic shock for the world economy. Global output is estimated by the IMF to have fallen by 3.5 per cent in 2020, and all countries – big and small, rich and poor – have been hit

According to UN trade and development experts UNCTAD ,online retail or e-commerce sales have increased significantly during the COVID-19 pandemic.

In this situation , financial innovations and international economic projects can play an important role in securing the smoothest exit from the pandemic and minimizing its effects . Cryptocurrencies Have proven to be a safe financial haven during the Covid-19 pandemic and all of other crises . The cryptocurrency market has shown more stability during difficult situations.

Both centred around tech, it would be fair to assume that cryptocurrency and eCommerce have the potential to compete with each other quite nicely in order to improve the current situation.

Cryptocurrencies, particularly Bitcoin, are already infiltrating the eCommerce industry, offering an innovative, viable and streamlined digital solution for many existing blockers. With the ability to appease consumer demand for immediacy and security, while expanding market share for retailers, cryptocurrencies could prove extremely beneficial for the eCommerce industry if adopted efficiently. More and more companies have grown to understand these benefits, leading to a surge in consumer attention, and it may not be long before we start to see the commercial use of cryptocurrency as standard

If cryptocurrencies prove to be an effective and reliable means for payments and settlements in the next 10 – 15 years, this will be a signal for market participants to use them as one of the main means of payment.

The total market capitalization of cryptocurrencies amounted to more than 740 billion dollars as of the end of 2020 (at the beginning of 2020, it was about 180 billion dollars). Investments in cryptocurrencies and technologies brought the greatest profit in 2020, which is 700% of profit for the year

The Cyrus projects aim to provide opportunities for people to take more responsibilities in order to build their own empire and by result have an efficient role in the world economy . In order to support the young entrepreneurs , Cyrus' team welcomes investors and traders to share their projects and earn more Cyrus. Other ways to get Cyrus for free is to earn it through rewards programs, Coinbase Earn and participating in affiliate programs . Now , The whole world is waiting for universal cryptocards, integrated into the payment system, as well as the implementation of the possibility of paying with QR codes from the wallets of the exchange in shops, cafes, online stores and so on. Knowing the requirements of the market, we are working on the practical implementation of these needs. So our future project is the Cyrus Card which allows the members to easily use their coins for online trading .

What is Cyrus Coin ? How does it work ?

Cyrus coin is a decentralized, peer-to-peer digital currency based on Binance Smart Chain (BEP20) that enables the members to easily exchange money online. In order to develop and provide easier ways for transactions, Cyrus Team decided to offer the currency code under the name of Cyrus Coin based on the BEP 20 and in future the coin is going to be on its exclusive blockchain All of the transactions fee is free Inside the Cyrus platform and its wallet . The Cyrus Team intends to further boost its members' incomes . It allows users to deposit crypto currency which can be instantly exchanged without fees or spread charges.

Starting with the Cyrus Global Exchange, the strong ecosystem will provide additional value to users by introducing new products and services.

The Cyrus Global Exchange is 100% in-house developed and will provide a highly liquid marketplace for crypto assets starting in Spring 2022 . We aim to bring all digital asset classes to the Cyrus Global Exchange to enable trading for all of them. The Cyrus coin offers the growing community of around 1 million Cyrus users a wide range of rewards and benefits for use on Cyrus products and services. Cyrus holders will enjoy access to the Cyrus Launchpad, which will be available later, and get exclusive access to upcoming features and rewards. Cyrus presents a major opportunity for existing Cyrus users and those who wish to use Cyrus' platform and services in the future.

The Cyrus platform is in the centre of a strong ecosystem and its three cornerstones:

- (1) Cyrus Global Exchange**
- (2) Cyrus Payments**
- (3) Third party services**

Cyrus will make digital assets tradeable for professional traders via the Cyrus Global Exchange. All digital assets will also be spendable for everyday use, such as buying groceries via Cyrus Payments. Additional services and products will be offered in cooperation with third parties by using Cyrus App. in future.

Cyrus Platform

The Cyrus digital investment platform is an easy-to-use online platform offering the opportunity to buy, sell and hold digital assets. It is offered as a web client (website) and will be offered a mobile application for Android and iOS soon. The Cyrus users can get benefit in different ways such as Swap: Interchange every digital asset instantly or Savings Plan: Enables easy set-up for automated, regular savings and many more to come

CyrusGlobal Exchange

The Cyrus Global Exchange also will be developed in order to make all digital assets tradeable . Furthermore, it will also act as an intermediary to ensure supply and demand for the Cyrus platform. Targeting professional traders, the exchange offers professional trading solutions, price matching capabilities and fully automated clearing, settlement and netting processes. The Cyrus Global Exchange enables traders to trade crypto assets and other digital assets at competitive costs. Additionally, the Cyrus platform will be able to trade on the exchange within its own value chain and sustain liquidity.

The Cyrus Ecosystem Token, Cyrus Coin , has been launched through an initial offering on the Cyrus platform. Cyrus was created with a maximum of one billion tokens about 20,000,000 of which have been made available to investors during its ICO . Every quarter , a specific amount of the tokens will be burned to drive demands .

After initial offering , Cyrus will be listed and tradeable on the various exchange against the available fiat currencies and other cryptocurrencies .

The CYRUS platform provides a community for networking and welcome to the new projects . The members will be able to use their CYRUS crypto as collateral. In conjunction with the launch of the Cyrus coin , we will introduce CYRUS Wallet.In the future, members who deposit coins in their Cyrus Wallet will also be able to earn CYRUS coins as a reward for lending to the network. They also can exchange their CYRUS either to the other cryptocurrencies or fiat currencies . Crypto assets holders can get more CYRUS coins, the more people join the CYRUS ecosystem, the more everyone benefits. Our platform will be a unique combination of multi-block-chain nodes, auto trading on multiple exchanges and a high-end user experience.

Security and Risk

CYRUS is building the platform with the highest security . We will use the latest-grade security to keep our members' assets and data safe. From multi-factor authentication, to encryption, to private-key double vaults, and more. Crypto assets will be distributed among several wallets and top exchanges. In addition, we will store a cold wallet treasury to provide last-resort insurance in case of a catastrophic event.

The CYRUS wallet will show the daily holders' transactions which will also be audited by an outside accounting firm several times a year.

We would like to express our gratitude to our mentors, advisors and to the many people in the crypto currency community that have been so welcoming and generous with their knowledge. Our team consists of talented and enthusiastic entrepreneurs in different parts of the world including UK , Canada , India and UAE .We might not be very famous people who graduated from the high ranking universities but we all have a wide range of technical knowledge and experiences and enough confident and commitment in our project . That's why we call ourselves " Cyrus Immortal Guard". We welcome all of the creative minds and dedicated hearts to join us in order to expand the Cyrus Guard.
